empowers you to look
and *feel* your best.

Mentor is committed to your long term well-being

Before your surgery, we are here for you to answer your questions, and most importantly, we are here for you after your procedure as well...with a long term commitment to your well-being.

Whether you've decided to look or feel better, knowing your surgeon has selected high-quality implants can offer you peace of mind with your decision long after your surgery.

As a world's leading maker of high-quality breast implants for over 30 years, Mentor has been the trusted choice by millions of women worldwide. Our track record of quality and innovation allows us to go above and beyond industry standards with the **most comprehensive protection plan available**⁷ - the MentorPromise.

MENTORPromise

MENTORPromise Protection Plan Overview

FREE AND AUTOMATIC ENROLLMENT

FREE LIFETIME PRODUCT REPLACEMENT FOR RUPTURE^{##}

UP TO **€1000** FINANCIAL ASSISTANCE COVERAGE FOR RUPTURE^{§§}

FREE PRODUCT REPLACEMENT IN THE EVENTS OF CAPSULAR CONTRACTURE (Baker III/IV), DOUBLE CAPSULE AND LATE STAGE SEROMA^{***}

FREE CONTRALATERAL IMPLANT at your surgeon's request

^{##} In the event of a confirmed rupture or deflation (leaking) of any MENTOR® Breast Implant due to wear or delamination requiring surgical intervention, regardless of the age of the implant, Mentor will provide a free replacement of a MENTOR® Breast Implant of any size in the same or similar style as the originally implanted product.

^{§§} When a replacement surgery of a MENTOR® Gel-Filled Breast Implant is required due to confirmed rupture occurs within ten (10) years from the date of implantation, provided that eligibility is proven and confirmed by Mentor based on its assessment and evaluation, Mentor will pay uninsured, out-of-pocket costs for operating room, anesthesia and/or surgical expenses directly related to revision surgery up to a maximum aggregate amount of €1000. Operating room and anesthesia charges shall be given payment priority. In such cases, the request for financial assistance under the MentorPromise Protection Plan must be made to your surgeon. Financial assistance does not imply a loan to you.

^{***} In the events of capsular contracture (Baker III/IV), double capsule or late-stage seroma in augmentation surgery of a MENTOR® Gel-Filled Breast Implant, Mentor will provide a replacement of a MENTOR® Gel-Filled Breast Implant, free of charge for the period of ten (10) years from the date of implantation, provided that eligibility is proven and confirmed by Mentor based on its evaluation of explanted product and assessment of all required documentation. Mentor will provide a replacement MENTOR® Product of any size in the same or similar style as the originally implanted product

IMPORTANT SAFETY INFORMATION

MENTOR® Breast Implants are indicated for breast augmentation, in women who are at least 18 years old, or for breast reconstruction. Breast implant surgery should not be performed in those women with active infection anywhere in their body, those with existing cancer or pre-cancer of their breast(s), those who have not received adequate treatment for these conditions or those who are pregnant or nursing.

There are risks associated with breast implant surgery. Breast implants are not lifetime devices and breast implantation is not necessarily a one-time surgery. Patients may require additional unplanned surgeries on the breast(s) because of complications or unacceptable cosmetic outcomes. Many of the changes to the breast(s) following implantation are irreversible (cannot be undone) and breast implants may affect the ability to breastfeed, either by reducing or eliminating milk production.

The most common complications with MENTOR® MemoryGel™ Breast Implants include re-operation, implant removal, capsular contracture, asymmetry, and breast pain. A lower risk of complication is implant rupture, which is most often silent (meaning neither you nor your doctor will know you have a rupture). The health consequences of a ruptured silicone gel-filled breast implant have not been fully established. Screenings such as mammography, MRI, or ultrasound are recommended after initial implant surgery to assist in detecting implant rupture.

The most common complications with MENTOR® Saline-Filled Breast Implants include re-operation, implant removal, capsular contracture, wrinkling, deflation, asymmetry, and breast pain.

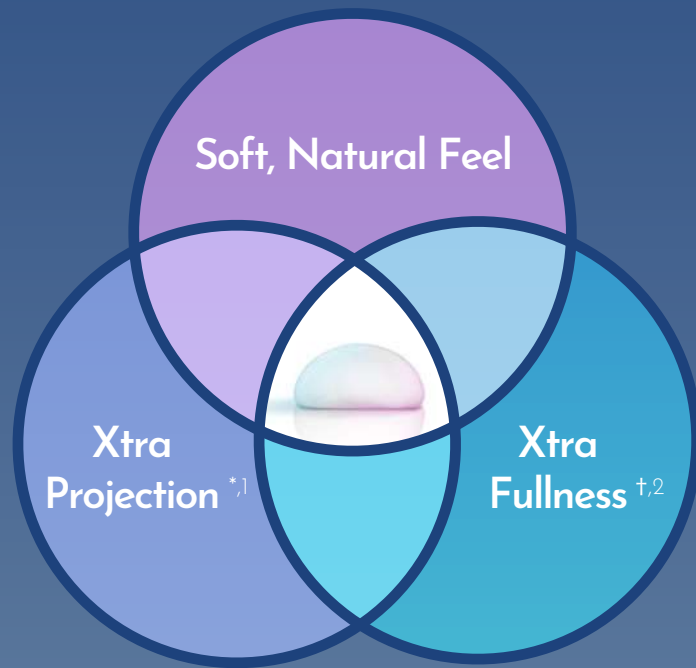

Patients are reminded to discuss the indications, contraindications, warnings, precautions and the risks and benefits associated with MENTOR® Breast Implants with their surgeon and review the Important Safety Information provided at www.mentorwllc.eu.

It is important that patients understand the risks associated with breast implant surgery when considering MENTOR® Breast Implants.
